PROFESSIONAL SUMMARY

A final-year Computer Engineering student with real-world experience in cybersecurity, including web and API testing (OWASP Top 10), vulnerability assessment, and SIEM log analysis/incident investigation using Splunk. Active in national CTF competitions with a practical understanding of attack techniques and defense controls. Seeking internship opportunities in roles such as Penetration Tester, SOC Analyst, or Information Security Intern

EDUCATION

Pibulsongkram Rajabhat University

Bachelor of Engineering in Computer Engineering **2023 – Present**

Cumulative GPA (GPAX): 3.58 | **Major GPA:** 3.80

TECHNICAL SKILLS

Security Tools:	Burp Suite, OWASP ZAP, Wireshark, Splunk (SIEM), SonarQube, Ghidra, Exploit-DB
Testing & QA:	Playwright (Automation), Postman (API Testing), Test Case Design & Execution
Programming:	Python, Java, C, JavaScript, HTML, CSS, SQL (Basic)
Platforms & OS:	Linux (Ubuntu, Ubuntu Server, Kali Linux), Windows 10/11, Docker, Git

PROJECT & TESTING EXPERIENCE

Security Tester – Web & API Security Assessment **Dec 2025 – Oct 2026**

ActivityPoint&CarbonPlatform | Tools:BurpSuite,SonarQube,OWASPTop10

- Integrated core security controls into the application, including webhook verification for external services (PromptGo & Helmet) and reward transactions
- Performed black-box and gray-box penetration testing with Burp Suite to identify potential vulnerabilities based on the OWASP Top 10
- Tested access control and authentication logic to prevent Broken Access Control (IDOR), SQL Injection, XSS, and Privilege Escalation
- Validated backend defenses: Role-Based Access Control (RBAC), API rate limiting, password hashing, and HTTP security headers (CSP,CORS ,HSTS)
- Scanned source code using SonarQube to find security bugs and code smells, verifying results to eliminate false positives

Software Tester (QA & Test Automation) **Dec 2025 – Oct 2026**

ActivityPoint&CarbonPlatform | Tools:Playwright,Postman,PostgreSQL,Git,Docker

- Designed positive, negative, and boundary test cases for user onboarding, automated point/carbon calculations, and admin dashboards
- Tested REST APIs with Postman to verify OpenAPI contracts, payload structures, error status codes, and JWT refresh token lifecycles
- Built end-to-end (E2E) automated regression test suites using Playwright for both User Portal and Officer Console workflows
- Documented clear defect reports with step-by-step reproduction steps to assist developers with rapid bug fixes

SOC Analyst Incident Investigation Lab **Oct 2026**

Virtual SOC Lab (Home Lab) | Tools: Splunk Enterprise, Ubuntu Server, Linux, SIEM

- Built a virtualized SOC environment deploying Splunk Enterprise on Ubuntu Server to ingest and analyze authentication (/var/log/auth.log) and firewall (/var/log/ufw.log) telemetry
- Engineered SPL-based behavioral detection rules for SSH brute-force attempts (≥ 3 failures in 5m) and network port scans (≥ 4 unique destination ports in 1m)
- Constructed the 'SOC Lab - Security Overview' monitoring dashboard featuring single-value metric cards, timeline spike charts, and top attacker IP tables
- Configured automated cron alert rules and documented end-to-end incident investigation workflows distinguishing confirmed observations from hypotheses

COMPETITIONS & ACHIEVEMENTS

- **Thailand Cyber Top Talent (2024, 2025, 2026):** Competed in the national CTF challenge solving tasks in Web Exploitation, Reverse Engineering, Forensics, and Cryptography (Ranked **Top 74** in 2024).
- **PSRU Cyber Hackathon:** Achieved **Top 10** in Season 2 and participated in Season 3 university cybersecurity competitions.
- **Business Brotherhood (2024):** Awarded a 200,000 THB development grant for the "Biosite" posture-detection camera project.
- **Research to Market (R2M 2023):** Won 1st Runner-Up at the university level and represented the university at the regional stage.
- **AI Tech Startup Competition:** Received an award under the Digital Innovation Hub project (Team BLOCKSPHERE).
- **National SolidWorks 3D CAD Contest (2024):** Won 2nd Runner-Up in the Rajabhat University Network competition.

CERTIFICATIONS & TRAINING

- Certificate: Basic Cybersecurity – National Cyber Security Agency (NCSA)
- Certificate: Penetration Tester Course – National Cyber Security Agency (NCSA)
- Certificate: Development & Application Security – T-Net
- Certificate: Thailand Cyber Top Talent (2024, 2025)
- Certificate: PSRU Cyber Hackathon (Season 2, Season 3)
